

CRISIS PREPARATION KIT

from National ID Recovery, LLC

Are You Prepared For...

- Identity Theft
- Natural Disasters
- Accidents or Illnesses
- Emergencies

We all say we're going to keep our personal information together and that we are going to be prepared if we have a disaster, but are we really prepared?

This **Crisis Preparation Kit** enables you to record all your personal and financial information to be kept in your safe deposit box or given to your attorney, accountant, or executor/executrix.

Then, if a disaster occurs or your wallet or purse is stolen by a thief, you will have easy access to all your information enabling you to act immediately.

The **Crisis Preparation Kit** is available for download 24/7 at our education website at <http://www.nationalidrecovery.org>.

Why Complete a Crisis Preparation Kit?

Life is unpredictable. You never know what may happen to you or your home from one day to the next. There are things such as natural disasters and theft that are beyond your control. Ask yourself these questions :

- *Do I have all of my credit card numbers on file?*
- *Would I know who to contact if my wallet or purse was stolen?*
- *Do I have a copy of my insurance in a safe place?*
- *Would my family or friends know who to contact if I became injured or incapacitated?*
- *Do I have a safe deposit box or a fire proof box for my important papers?*
- *Do I have an inventory list of all my possessions?*

If you are uncertain of the answers to any of these questions, we strongly suggest that you take advantage of our free **Crisis Preparation Kit**.

Protect yourself and your home.

How Does It Work?

All you have to do is gather all of your vital documents together and transfer the information from them onto the worksheets in the **Crisis Preparation Kit**.

Now you have all of your personal and important information in one easy to read document. Once you have completed the worksheets, you should make duplicates to give to your attorney, accountant, or executor/executrix.

Keep at least one copy for yourself in either a safe deposit box or a fire proof box in your home.
